INTRODUCTION

"Steampunk is the scholar's science fiction." This is the brief description Dr. Grymm Laboratories has come to use to describe the fascinating art movement that seems to have taken the world by storm. Although the descriptive term *Steampunk* was coined in the world of literature within the past thirty years, the origin of the ideas go back much further. Born from the writings of H. G. Welles, Mary Shelley, and Jules Verne and the inventions of Nikola Tesla, Steampunk offers a melding of late 1800s aesthetic with scientific discovery and otherworldly technology. Though Steampunk has reached a tipping point recently, it is not just a current trend. The Steampunk aesthetic has been woven throughout our media and consciousness for more than a century in books, film, music, fashion, and art. Even with a time machine, I'm sure the great-grandparents of science fiction literature would not have imagined that their words and inspirations would have created such a fantastic world.

Today, Steampunk has a fan base that stretches around the globe. Amazing themed events attract well-dressed enthusiasts to maker's fairs, festivals, fashion shows, art exhibits, conventions, musical performances, tea parties, and masquerades. Each enthusiast brings his or her own view of what Steampunk is. The genre appeals to both young and old, and reaches out to inspire even those who would not have considered themselves artists. From the moment fans are compelled to build their first pair of goggles or take apart an old brass lamp from a thrift store and reassemble it into a Victorian weapon, they are hooked. Some choose to recycle from our past to invent beautiful jewelry, contraptions, and props.

Others design and build from scratch, creating epic works of functional art such as clocks, lamps, and vehicles. Still others hone their talents by creating personal character aliases and penning tales about far-off realms where their adventures take place.

Within the pages of this book you will find a collection like no other. From novice to professional, the artists we have brought together celebrate an art movement where a reimagined past is recycled into an unbelievable future. Steampunk artists create an alternate world not bound by the modern millennial conventions of physics, science, and convenience technology. Artists reject the sleek and plastic world we have come to rely on. Steampunk is a chance for artists to build with their hands and their imaginations, just as the great innovators of the industrial revolution did.

Steampunk also creates a tightly knit community. Artists help other artists by inspiring, motivating, and challenging each other to create. While looking through submissions for this book, we were amazed by the amount of talent we had to choose from. This collection of 1,000 images represents a wide variety of styles and mediums to best capture Steampunk in all of its many wondrous facets. Steampunk style is as unique as the person who creates it.

On behalf of the crew at Dr. Grymm Laboratories, I hope you enjoy the fantastic journey these images will take you on. May they inspire you to follow the curious tinkerer who lives inside all of us.

ACKNOWLEDGMENTS

First and foremost I would like to thank Mary Ann Hall, Tiffany Hill, and the team at Quarry Books for allowing me to work on this wonderful publication with them. I would also like to thank Barbe Saint John for her assistance in pulling this book together.

Very special thanks go out to my wife, business partner, and right side of my brain, Allison DeBlasio, for her constant support and hard work on this project. Without her coordination and organization, this book would not have been possible.

I would be remiss if I did not thank all of the artists who have contributed to this book. It has been an honor to work with all of you on this project. May your creativity continue to build this world of Steampunk that has brought us all together.

Finally, I would like to dedicate this book to my sons and future Steampunks, James and Jack, who give me my inspiration every day.

Sincerely;

Joey Marsocci

a.k.a. Dr. Grymm
Proprietor of Dr. Grymm Laboratories

ABOUT THE AUTHOR

Dr. Grymm's alter ego, Joey Marsocci, along with his business partner and wife Allison DeBlasio, are proprietors of Dr. Grymm Laboratories in Connecticut. Grymm's custom contraptions and sculptures have been seen in Steampunk exhibits, films, television, theater productions, and publications around the world. Most recently, Dr. Grymm, known for his Victrola "Eye-Pod" (a modded iPod) and his Brainstorm Machines, exhibited at the Oxford University History of Science Museum Steampunk Exhibit in 2010, and is also a featured artist at The Cosmopolitan Hotel, opening in Las Vegas in 2011. Annually, Dr. Grymm hosts and curates an international art exhibit, "The Steampunk Bizarre," which is the subject of the documentary *I AM STEAMPUNK* by Neurotic Films.
